Cloudbridge

Atlassian cloud apps that replace
Marketplace apps which won't make it past
Data Center end of life in March 2029.

Atlassian stops supporting Data Center on March 28, 2029. A lot of companies running Jira and Confluence on their own servers rely on Marketplace apps that were never rebuilt for cloud, and Atlassian publishes lists of the ones that won't be. When those companies move, those features just disappear.

HOW IT RUNS

HIGHLIGHTS

- Four Forge apps covering gaps that Data Center customers lose when they move to cloud.
- No data leaves Atlassian: no external calls, so every app keeps the Runs on Atlassian badge.
- Picked from a scan of the Marketplace, not a guess: 212 flagged apps ranked by demand and fit.

AT A GLANCE

4

apps built and running on a test site

196

unit tests across the four apps

212

Data Center apps on Atlassian's "won't be built for cloud" lists, scanned for gaps

Atlassian Forge • Node.js 22 • UI Kit • Python (stdlib only) for the gap scan

Intermundia Labs builds systems like this for other teams:
agent workflows with a sign-off, data feeds, model
evaluation and data migrations.
